

Dear AheadComputing Team,

My name is Binsy Rajendran, and I'm currently pursuing my Masters in Electrical and Computer Engineering at Portland State University, with a focus on Digital IC Design, Physical Design, and SoC development. I'm writing to express my interest in an internship or entry-level position with AheadComputing, particularly aligned with your exciting work on RISC-V CPU core IP.

My academic and project background includes RTL and low-power digital design, hands-on experience with RVfpga-EL2, and tools like Synopsys Design Compiler, Cadence Innovus, and QuestaSim. I'm eager to contribute meaningfully to AheadComputing's mission of building better, more accessible computing.

I've attached my resume for your review and would welcome the opportunity to discuss how I can contribute to your team. I'm currently based in Hillsboro, Oregon, and am flexible with remote or hybrid arrangements.

Thank you for your time and consideration. I look forward to the possibility of working together.

Warm regards,

Binsy Rajendran
