

Hi Team,

My name is Srijan Yendluri, and I'm currently pursuing my Masters in Computer Engineering. I'm reaching out to express my keen interest in contributing to AheadComputing as an intern starting this May.

I've been following the innovative work being done at AheadComputing, particularly your breakthroughs in microprocessor architecture, and I'm genuinely excited about the possibility of getting involved and learning from your team.

I'm available full-time in May and would be happy to contribute on an unpaid basis during that period. If my work proves valuable, I'd love to explore opportunities to continue through the summer and beyond. I'd also be happy to speak with you in a short call or interview to discuss how I can support your efforts.

I've attached my resume for your reference. Thank you for considering my application. I look forward to the opportunity to connect.

Best regards,

Srijan Yendluri
