

Hi,

I hope you're doing well. I am very interested in your startup and excited about the future of RISC-V architecture. The work being done in this space is truly inspiring, and I would love to explore ways to contribute.

I have some experience with formal verification and am eager to deepen my expertise in this field. I am particularly interested in applying and expanding my skills in a dynamic environment like yours. If there are any opportunities where I could learn and contribute, I would love the chance to discuss them further.

I have attached my resume for your review. I would appreciate the opportunity to connect and learn more about potential roles at your company. Looking forward to your response.

Thanks

-Shweta
