

Dear Ahead Computing Team,

My name is Rubi Villanueva Molina, and I would like to explore the opportunity to join your team in Mexico. I am excited about Ahead Computings vision of developing innovative RISC-V solutions, and I believe my skills in database management, automation, and data analysis can contribute to the success of your projects.

I hold a degree in Industrial Engineering and have experience in Oracle database administration, Python and SQL development, process optimization, and data analysis. Currently, I work as a Junior Oracle DBA at Tata Consultancy Services, where I manage Oracle databases (10g-23c), design automation scripts, and optimize system performance. Additionally, I have experience developing predictive models and improving processes using Lean Six Sigma methodologies.

I am motivated by the opportunity to collaborate with Ahead Computing in developing cutting-edge technology and enhancing system efficiency. I have attached my resume for your review and would love the chance to discuss how I can add value to your team.

I appreciate your time and look forward to the opportunity to further discuss how my skills align with your goals.

Looking forward to your response.

Best regards,

Rubi Villanueva Molina
