

Hello Sir/Ma'am,

I am Adwait Joshi and I recently came across Mr.Pearce's post about how AheadComputing's RISC-V journey.

I am currently pursuing my Masters in Computer Engineering at NC State University with specialization in Computer Architecture and Frontend VLSI. Currently in this Semester I have taken Advanced Microarchitecture, where I am learning about OOO Execution using PRF style and ASIC Verification.

I would love to discuss if there are any internship opportunities available at AheadComputing.

Thank you for your time and consideration.

Kind Regards,

Adwait Joshi
