

Hi! My name is Joey Rudek, and I'm currently a fourth-year PhD student at UC San Diego working in computer architecture and hardware security.

I've heard a bit about Ahead via LinkedIn -- you guys are doing exciting stuff! I'm emailing to inquire regarding job openings (since clicking the "Join Us" button on the posting sends me to a `mailto:` link). My experience outside academia consists largely of simulator (i.e., gem5) work at Intel and Rivos. Some more detail is in my resume, which I've attached.

Finally, please consider me as an applicant with an MS but no PhD -- I'm applying for jobs because I'm considering leaving my program with a terminal Master's degree to work in industry.

Thanks, and I'm looking forward to hearing from you!

Joey Rudek
