

Good afternoon,

My name is Seth Davis. I am currently a student at Brigham Young University, studying accounting in one of the top three programs in the nation. I recently came across AheadComputing and was very impressed by the management and the work being done with RISC-V.

I am very interested in exploring potential internship opportunities with AheadComputing for this upcoming summer. Given my background in accounting and my interest in early-stage companies, I believe I could contribute meaningfully while also gaining valuable experience from your team. I am open to remote work and potential relocation.

I would love to learn more about AheadComputing. Please let me know if there are any internship openings or if there's someone on your team I could connect with to discuss further.

Thanks,

Seth Davis
