

Hi Ahead Computing team,

Good day.

This is Peter Lai and I hope this mail finds you well.

It took me a while to reach out to you as I'm not sure whether this is good timing but I'd like to discuss with you to see if I could be a good fit for the team to expand new business in the markets.

A bit about myself: I've just finished my MBA at Schulich, York University and have been thinking about contributing to the organization which fits my career path in technology field as well as which I could contribute my past experience in the same area and my MBA knowledge.

Before pursuing MBA program, I've been working majorly with Advantech in charge of South Asia region as sales head role in charge of key account design-in, ecosystem build-up with Intel, Microsoft, several CSP, channel management as well as online business since Advantech aims at different segments of business. And currently I'm with Lanner Electronics, leading edge AI platform to build ecosystems recruiting ISV to offer as solutions.

Sitting in Toronto, I'd be appreciated to know your feedback to see if we could have a talk to take this further.

Have a great day.

Best,

Peter Lai
