

Hello,

I am reaching out to express my interest in a full-time role at Ahead Computing starting June 2025 and to inquire about a Spring internship opportunity, whether paid or unpaid. I am currently pursuing a Masters in Electrical and Computer Engineering at the University of Washington, Seattle, specializing in ASIC design and computer architecture. My experience includes RTL design, verification, and low-power architectures, with a focus on ARM-based processors and hardware accelerators. I have also worked extensively with tools like Vivado, Synopsys DC, and Cadence for synthesis, timing analysis, and physical design.

I am particularly excited about Ahead Computings work in high-performance and energy-efficient computing. The opportunity to contribute to innovative architectures that push computing efficiency forward aligns closely with my expertise and interests. I would love to connect and discuss how my skills can support your team. Please find my resume attached, and I look forward to your response.

Best regards,

Shreya Mahetaliya
