Hello!

I am a senior at Harvard finishing my undergrad degree in EE/CS, and I have a particularly strong interest in RTL design and verification. I am looking for work following my graduation this May, and am very interested in working at your company.

I am attaching my resume below. I am very excited at the prospect of working for Ahead Computing, and would greatly appreciate your time. If there is any relevant opportunity that you are willing to consider me for, then I would be very happy to discuss it further.

Thank you for your time,

Mitchell Sharum
