Scopri perch  importante

Dear Mrs. Marr,

I hope that you are well.

Thanks for accepting my request for connecting through LinkedIn.

Let me e-introduce myself: Im the CEO of E4 COMPUTER ENGINEERING SpA, a European System Integrator and Technology Provider of infrastructures for HPC, AI and HPDA. E4 is painstakingly scouting the high-end compute market to find innovative components and devices that E4 will eventually integrate into products and solutions. Beyond adopting the usual X86/64 and NVIDIA technologies, E4 is very active in the RISC-V market, in which has integrated the first multi-node cluster ([mettere link alla pr di monte cimone](#)). Our scouting exercise and the consequent analysis of the objectives have should that there may be a good product match between E4 and AheadComputing and therefore an opportunity to collaborate.

May I kindly ask for a videoconference in the next weeks for a mutual introduction and to check if we can find a common ground to collaborate?

Best,

Sent from my mobile device

Cosimo Gianfreda
