

Dear Ahead Computing,

My name is Krithik Sama, and I am a senior at McNeil High School in Austin, Texas, graduating in May 2025. I admire this organizations work and would love the opportunity to contribute while gaining hands-on experience in electrical and computer engineering.

This summer, I am eager to learn and deepen my understanding of how the field applies to real-world projects. An internship at your company would allow me to collaborate with professionals, expand my skill set, and build lasting connections.

My passion for STEM is reflected in my involvement in robotics (as Co-President), engineering, and cybersecurity clubs, as well as coursework in computer science and digital electronics. I also had a web development internship for a local preschool where I tripled viewership with SEO techniques. While past internships have given me valuable insights, I am seeking further industry experience to complement my academic background.

I would love the opportunity to contribute to your team and gain hands-on industry experience in a field I am deeply passionate about. I have attached my resume for your review and would greatly appreciate the chance to discuss how I can add value to your company as a remote summer intern. Please let me know if you would be open to a brief call at your convenience.

Best regards,

Krithik Sama

Subject:RE: Enthusiastic High School Senior Interested in a Summer Opportunity

Dear Company Officials,

I just wanted to follow up on the email below and see if you had a few minutes to speak with me about hardware and/or software internships at the company.

Im currently a high school senior who is committing to UT Austins ECB (Honors Electrical and Computer Engineering + Canfield Business Honors) program in the fall, and I would greatly appreciate the chance to speak with you and learn more about it.

Thanks in advance!

Krithik Sama
