

Dear hiring team,

Im writing to express my interest in exploring potential opportunities at your company in the field of chip engineer. My name is Felipe Muoz, and I have a strong background in computing, having recently graduated with a PhD on computer architecture.

While my expertise is in the software part, with architecture awareness (dataflow frameworks, schedulers, ), Id like to pivot towards a career in hardware design, as in my recent role at INNOVA Microelectronics.

I'm attaching my CV for your review. I can see several positions in CPU design where I could fit in very well, either in the USA or Mexico - USA positions are my preference. I would appreciate the opportunity to discuss how my skills and interests align with your company's needs and to keep my CV on file for any future openings. Also, I could provide references if you need them.

Thank you for considering my interest, and I look forward to the possibility of working with your team.

Best regards,

Felipe.
