

Hello:

I hope this message finds you well. I'm reaching out to express my interest in exploring opportunities with AheadComputing, even though I understand there may not be an open position at this time.

With over 28 years of experience in ASIC/SoC verification including deep expertise in UVM methodology, testbench development, and VIP integration I bring a strong track record of delivering robust verification environments for complex chip designs. Most recently, I was engaged as a contractor in the defense sector and, after completing a sabbatical to pursue two major hiking expeditions, I'm now actively seeking my next challenge in the semiconductor space.

I've admired AheadComputing for its innovative contributions to chip design and would be thrilled to contribute to your team when the opportunity arises. I've attached my resume for your consideration and would welcome the chance to connect and discuss how I can add value to your verification efforts.

Regards,

Shyla
