Hi Member at Advance Computing,

Hope you're doing well! My name is Harry Hsiao, and Im currently pursuing my masters in Computer Engineering at NC State University. I came across your company after seeing a LinkedIn post by your Principal Engineer - Mr. Subramanian, and I was immediately drawn to the exciting work youre doing in computer architecture, design, and verificationareas Im deeply passionate about as well.

While I still have a year before graduating, I wanted to see if there might be any opportunity for me to contribute as a volunteer intern this summer (May to August). I understand there may not be any official openings right now, but Id be grateful for the chance to get involved, learn, and support the team however I can.

Ive attached my resume for reference and would be happy to chat if this sounds like something that could be a fit.

Thank you for your time, and I hope to hear from you!

Best regards,

Harry Hsiao
