I've worked with Oliver in the past; he is very skilled in multiple SW areas and even has had a stint in PreSi. He is passionate about tools, helping the team succeed through better tools/infrastructure. I'd like for Ben to have a chat with him an interview with him; he'd ideally fit into our budget later on as the team grows and we need more IT/infrastructure/Indicators/TFM/Full Stack type of expertise. (or now...)
