Hello,

My name is Kushal Rao, and I am a student at the University of Wisconsin-Madison. I am from Portland, Oregon, and while exploring companies for summer opportunities, I discovered AheadComputing is based in my hometown. Upon learning more about AheadComputing, I became very interested in your mission and innovative approach.

I am particularly drawn to AheadComputing's commitment to developing breakthrough 64-bit RISC-V application processors. Your focus on leveraging open-source architecture to address computing performance challenges in artificial intelligence, such as bandwidth shortages and data processing limitations, aligns with my academic background and personal interests.

Additionally, I am eager to gain hands-on experience in a startup environment, where I can contribute to real-world projects and learn from a team of experienced professionals. The opportunity to be part of a fast-paced, innovative company like AheadComputing is something I find incredibly exciting.

I am writing to inquire about any available internship positions for this summer or similar opportunities that would allow me to gain experience and understand the work culture in a startup environment. Please let me know of any opportunities that may be available at AheadComputing.

Sincerely,

Kushal Rao
