Hello,

I;m a grad student at Texas A&M University, enrolled in Electrical Engineering. I came across AheadComputing and was interested in exploring any internship opportunities for summer. I see that AheadComputing works in RISC-V and I have worked on RISC-V in a project. I have a combined experience of working as an FPGA and Software engineer for 3 years. I'm open to any roles in VLSI Design and Verification. I have attached my resume for your reference. I believe that working at AheadComputing would be a very good learning experience for me. Please let me know If my skills match any of your requirements.

Thanks & Regards

Pranava Krishnamurthy Bhat
