Hello Sir/Ma'am,

My name is Adwait Joshi, and Im currently pursuing my Masters in Computer Engineering at NC State University, with a focus on Frontend VLSI and Computer Architecture.

Im particularly interested in Summer and Fall 2025 internship opportunities in Design, Verification, and Modeling roles. My coursework in Advanced Microarchitecture (Out of Order Execution using PRF) and ASIC Verification (learning SystemVerilog testbenches) and prior projects in Computer Architecture and Verilog Design align well with your work.

Ive attached my resume for your review and would welcome the opportunity to discuss any intern roles available at AheadComputing.

Looking forward to your response !

Kind Regards,

Adwait Joshi
