Hi,

My name is Medhaav Chandra Mahesh, a recent new gradfrom UC Berkeley and I am currently looking for new grad roles related to digital design or verification. I recently found out about Ahead Computing and I am interested in learning more about the company and the opportunities available. I am currently working for another hardware startup and also helpeddesign a 16nm Soc at UC Berkeley that has been taped out. I would love to chat about myskills and experience and see if I'm a good fit for the company. I've attached my resume below for you to look over.

Thank you, Medhaav
