Hi Team,

This is Rahul here. I am currently working as a Physical Design engineer at Intel, Oregon. I am working on the integration of test chipsthat feed yield learning of Intel's latest technologicalnodes such as Intel 18A.

I have worked with apr and floorplanning tools in my current role.

I am at a point in my career where I can start contributing outside of my current position and Ahead Computing looks like the perfect place to do so.

I am attaching my resume for your reference and if you feel I'd be a good fit, let me know and we can talk more.

Regards,

Rahul.
